Speaker Blower - Amplifier/Limiter VST plugin for Windows - V. 1.2

EXCLUSIVE FREE VERSION FOR SPEAKER BLOWER RECORDS - the first
d´n´b label in Portugal
http://www.sbrecs.net

NOTE: This plugin is free but can not be redistributed. You must link to
www.sbrecs.net/vst.htm   -   Check the Terms of License Agreement

Features:

-Signal amplifier (up to +18dB) with built-in limiter
-Input/Ouput monitor
-Separate signal and limiter level meter
-Simple, intuitive, idiot-proof GUI
-Mono and stereo components
-Modular vintage sci-fi design

Use it:

-on heavily automated tracks (ex: where you just want to raise 0.5 dB
without touching the automation parameters)
-as a signal amplifier/limiter on any channel or on busses (to raise the level,
control dynamic range and/or eliminate peaks)
-on your soundcard input channel on your VST host to prevent any
occasional clipping during recording – no more peaks!
-on your master channel, using it as a limiter – no more overloads or red
lights!
-on home mastering

Tested in Ableton Live 7 and Logic Audio Platinum 5.5.1 only

Make some noise and watch your speakers!
